Executive Summary

A competent and committed Business Analyst Team Lead in the financial domain with a well-grounded understanding of all Software Development Life Cycle (SDLC) methodologies, Business Requirements gathering, evaluating Data Sources, and translating requirements into Specifications, Software Design and executing User Acceptance Testing (UAT). The background includes compelling experience of working in the areas such as Asset Management, Financial Modeling, Capital Markets, MBS, Treasury, and Risk Management. Proficient in all Aspects of SQL, ETL, Business Analytics and various Analytic tools. A data Science and Machine Learning enthusiast with understanding of python and understanding of its data analysis libraries such as pandas, numpy, matplotlib and seaborn.

- Experience in capital markets, Asset management and Wealth Management
- Experienced with detailed document, report preparation and complex internal/external data analysis responsibilities.
- Knowledge of Capital Market (asset classification) instruments like fixed income, Derivatives (Swap, Options), Equities, Bonds, Credit Risk.
- Knowledge of Index market such as Equity, Fixed Income, Hedge Indices.
- Manage Multiple IT projects and products with complex scopes, including internal and external dependencies.
- Oversea end-to-end delivery, encompassing process improvement and technologies and modernization to achieve desired outcome.
- Well versed in working with MySQL and writing complex query for data Analysis.
- Understanding of data analysis libraries like NumPy and pandas.
- Well versed with data visualization tools and library like seaborn and matplotlib.
- Proficient in developing BRD, FRD, SRS (with detailed knowledge of functional and non-functional requirements), and RTM.
- Experienced with detailed documents, report preparation and complex/internal and external data analysis.
- Knowledge in Data Warehouse: Data Mapping, Data Modeling, OLTP/OLAP, and designing E-R Models. Proficient in documenting of Test Plans, Test Cases, Test Scripts, Test Procedures based on the Design Document and User Requirement Document for the Black Box, Functional, Usability and User Acceptance Testing (UAT).

Education

Master of Business Administration (Finance & Investment Banking)

Lincoln University

📅 2012 - 2015

📍 Oakland, United States

B.A in International Hospitality Management

Queen Margaret University

📅 2006 - 2009

📍 Edinburg, United Kingdom

Skills

- **Business Skills**—Requirement elicitation, Business Requirement, Business Process Research, Analysis, Documentation, Review, JAD Session, Prototype, Workshops, Change Management, Negotiation, Critical Thinking, Collaboration, Conflict Resolution, Escalation Management.
- **Technical Skills**—UML, Use case, Data Mapping, MS Office (MS Excel, MS Access, MS PowerPoint, MS Visio, MS Project), Adobe Photoshop, Outlook, SharePoint, JIRA, HP quality center, ETL, Tableau, Linux, Postman, Alladin, Informatica cloud MySql, Python for data Analytics.
- **Finance Domain**- Capital Market, Trade Management, Trade Surveillance, ,Asset management, Trade Monitoring Compliances, Index Market
- **Soft Skill**- Organizational Skills, Analytical Skills, Self-Motivated, Independent Thinker.

Awards And Appreciation

- Promoted from Module Lead to Team Lead
- Got Collaboration and Consistent Performer awards for two consecutive quarters.

Professional Experience

Mphasis-Project Lead

Client: Blackrock

📍Noida, U.P

📅08/2021 - current

Project 1: Flattening of Composite Indices

In Aladdin the vendor published indices are constructed as composite using multiple standalone components. To align with vendor methodology and improve operational efficiency for our index data user these composites are updated to use a single component whenever possible.

- Performed end to end analysis on over 1500 indices to be flattened and generate the process to perform so.
- Act as a liaison across business, design and delivery teams to ensure alignment on objectives, transitioning into subject matter expert role as needed.
- Constructed over 300 flattened indices both for open and proforma data respectively in the legacy world and subscribed to respective Client.
- Performed Gap analysis on open, proforma, projection and summary data between legacy indices and API derived indices.
- Derived process and migrated over 300 indices to Ace Universe.
- Performed analysis on data source and mapping and created those as part of flattening process.
- Created several automation Process to provide client specific data through python script with the help of internal tool called “NJADMIN”
- Understood the business logic, User requirements and test-objectives to develop test plans, test cases as well as perform Regression testing on data of different client,
- Performed User Acceptance testing with client to make them understand the whole process

- Subscribed and replace 1500 composite indices to 300 indices.

Project 2: Indices Universe Onboarding and Migration

Index onboarding is the process of onboarding new indices To-BE (ACE) and Also migrate the existing ones from Legacy World (BLK)

- Analyze the request and channel into New Implementations.
- Collaborated with Stoxx, MSCI, FTSE to gather index files and details for new indices onboarding.
- Understood different methodologies for different vendors for different Asset class and different type (open, close, proforma, projections)
- Worked with development Team on Blackrock to develop automation scripts to handle Data Acquisition, transformation and load position data for client subscriptions via help of functional requirement documents
- Detailed AS-IN and TO-BE state documentations.
- Over 4000 Stoxx indices onboarded along with daily, quarterly, yearly automation.
- Understood the business logic, User requirements and test-objectives to develop test plans, test cases as well as perform Regression testing on data of different client.

Project 3: Calendar Integration of Indices

At Alladin Indices were loaded only on business days and a manual intervention was required to roll over the price, Position, Market value and Risk core for holidays for different region such as EMEA, EUROPE and America differently for over 14000 indices. As Indices are based region wise so it needed to be done manually. Lead the projects along with developers from both vendor as well as BlackRock to integrate the entire end to end project.

- Performed Analysis on Entire Indices universe of to understand the scope for Integration project.
- Collaborated with vendors such as Stoxx, Msci, Ftse etc to get the Calendar Holiday day details and worked with development team of vendor side to automate the process via API.
- Worked with development Team on Blackrock to develop automation scripts to handle Data Acquisition and load the Holiday calendars in internal tools.
- Create screen mockups to elucidate requirements, working closely with UX/Design team to ensure design aligns with business requirements.
- Documented Documentations such as BRD, FRD, User stories for the same
- Used AHA platform to track down the process of the project.
- Performed analysis on data source and mapping and backend integrations.
- Automated the Process Via internal tools such as Benchmark Construction, NJ Admin.
- Understood the business logic, User requirements and test-objectives to develop test plans, test cases as well as perform Regression testing on data of different client,
- Performed User Acceptance testing with client/users.

Project 4: Vendor Change management

- Identify list of impacted indices both on Ace and Blk environment
 - Managed Client communications
 - Maintained and Analyzed script changes required to implement those changes
 - Detailed AS-IN and TO-BE state documentations.
 - Collaborated with vendor to understand the changes and communicate the impact to the client
 - Performed several regression/autonomation testing on Dev before production Go-Live.
 - Coordinate and participate in Business Acceptance Testing to obtain business partner sign off of finished product.
 - Create user documentation and facilitate training on new functionality/products; as well as facilitate Business Outcome Testingwith focus groups prior to releases.
-
